The Public Involvement Manager at Leicester Diabetes Centre and the NIHR Biomedical Research Centre keeps a mailing list of people who have agreed to be part of our public involvement work. The database contains your name, the contact details you have provided and a note about the kinds of patient and public involvement activities that interest you. This includes information about what health conditions you are interested in but does not contain any health information about you.

Only Leicester Diabetes Centre and the NIHR Biomedical Research Centre staff who work in public involvement have access to this information, which is kept in a password-protected file on a password-protected computer in a secure building. Your contact details are never passed to the researchers or any outside organisation.

We will hold the personal data you provided us for as long as you want to keep informed about patient and public involvement opportunities. Over time, new staff may be employed who work on public involvement and post holders may change. Should this happen, everyone on the database will be informed.
